

## LUBORON™ OUTDOOR GEAR LUBE

### DESCRIPTION:

Larger payloads, more powerful engines, and higher sustained speeds have contributed to increased gearbox pressures and temperatures. LuBoron Outdoor Gear Lube is a premium-quality gear lubricant designed to protect gears under severe operating conditions.

LuBoron Outdoor Gear Lube is a premium multi-purpose lubricant suitable for use in both differentials and manual-shift transmissions. LuBoron Outdoor Gear Lube offers extreme resistances to gear wear and scoring in high-pressure, shock-load service, and will remain non-corrosive even in the presence of moisture.

LuBoron Outdoor Gear Lube is offered for all applications covered by A.P.O. designation GL-1 through GL-5 covering all gear requirements from those requiring straight mineral oils through work-gear, spiral-bevel, and hypoid axels.

LuBoron Outdoor Gear Lube is available in 80W-90 grades and in 35Lb. plastic pails and 400 Lb. drums.

LuBoron Outdoor Gear Lube creates a solid lubricant wear barrier and prevents metal-to-metal contact. This solid boric-oxide barrier provides a molecular bond to both metal surfaces, but retains ultra low-friction properties between the oxide coatings.

### SPECIFICATIONS EXCEEDED:

Mil-L.....2105C  
Rockwell Standard.....(Timken, 0-72, 0-73, 0-64, 0-65)  
Moisture & Corrosion.....(CRC-L-33, 1 and 7 days)  
High-Torque Axle Test..... (CRC-L-37)  
High-Speed Axle Test.....(CRC-L-42)  
Axle Test.....(CRC-L-19 and CRC-L-20)  
Ford Axle Corrosion Test  
Oldsmobile-Buick Shock Test  
Mack GO-F, GO-d, and GO-B  
General Motors Truck and Coach Division
